inst**Problem 1**

this is my first problem

`answer` adfasdfasdfasdfadsf adfadsfasdfasdfa in this time this is my first homework test
paper so it is only a simple sln [\[1\]](#)
“helloworld”

初めて

- 一つ
- 2つ
- 3つ

description

cpu cpu is center process unit

ram ram is the random access unit

code ref

```
#include<iostream>
#include<vector>
#include "a.h"
#include "b.h"

int main(){
    std::cout<<"helloworld"<<std::endl;
    std::vector<int> t;
    t.push_back(1);
    t.push_back(2);
    t.push_back(3);
    std::cout<<a()<<std::endl;
    b();
    for(std::vector<int>::iterator it = t.begin(); it != t.end();it++){
        std::cout<<*it<<std::endl;
    }
    return 0;
}
```
